

COP26 VIRTUAL OCEAN PAVILION EXHIBITS

Blue Climate Initiative

Description

The Blue Climate Initiative accelerates ocean-related strategies to address the climate crisis. We harness innovation and traditional knowledge, to reimagine, catalyze, and scale ocean-related strategies and breakthrough solutions to protect the ocean and combat climate change. The Blue Climate Initiative (BCI) – a flagship program of the United Nations Decade of Ocean Science for Sustainable Development – engages scientists, innovators, investors, community members and global leaders, harnessing research and innovation to accelerate ocean-related strategies to combat climate change. In doing so, BCI unlocks solutions to urgent global challenges including improved human health, sustainable food supplies, renewable energy, flourishing biodiversity, protection of genetic resources, and vibrant ocean economies. Guided by the Sustainable Development Goals, the BCI advances collective attention, investment and innovative action for People, Ocean, and Planet.
