

COP26 VIRTUAL OCEAN PAVILION EXHIBITS

International Alliance to Combat Ocean Acidification

Description

With a membership representing nearly 300 million people and 366,414 kilometres of coastline, the OA Alliance brings together governments and organizations from across the globe dedicated to taking urgent action to protect coastal communities and livelihoods from the threat of ocean acidification and other climate-ocean impacts.

Together, OA Alliance members are:

1. Elevating urgency for climate action by highlighting impacts to ocean resources, ecosystems and communities.
2. Integrating ocean into climate commitments, policies and multi-governmental frameworks.
3. Translating knowledge into policy actions by national, regional and subnational governments.
