

COP26 VIRTUAL OCEAN PAVILION EXHIBITS

Ocean Policy Research Institute of the Sasakawa Peace Foundation

Description

The Ocean Policy Research Institute (OPRI) aspires to become a "think-and-do-tank," to address the many challenges to the ocean and thereby achieve the mission of the Sasakawa Peace Foundation to establish a new system of ocean governance. To do so, we will expand our research and advocacy activities, disseminate relevant information, facilitate necessary measures, and promote networking opportunities. We sincerely wish to collaborate ever more closely with like-minded stakeholders who are also concerned about the oceans.
