

# COP26 VIRTUAL OCEAN PAVILION EXHIBITS

## One Ocean Hub

### Description

The One Ocean Hub is an international programme of research for sustainable development, working to promote fair and inclusive decision-making for a healthy ocean whereby people and the planet can flourish. Our research is particularly concerned with understanding the impact of climate change on the ocean and the communities in South Africa, Namibia, Ghana, and the South Pacific.

Our Approach to Climate Change Research:

- Our research with coastal communities who are reliant upon the ocean, looks at what barriers communities face in taking part in climate-action.
- Our research on marine ecosystems increases knowledge of deep-sea species and habitats to better understand their role in mitigating climate change and the impacts climate change may have upon them.
- Our research on fisheries examines the impact of climate change, over-exploitation, pollution, and changing ocean conditions on fish that are essential to coastal community livelihoods.
- Our research on human rights highlights the needs of children and young people, women, indigenous peoples, small-scale fishers, and other communities dependent on a healthy ocean, amplifying their voices in global dialogue.

The One Ocean Hub is funded by UK Research and Innovation (UKRI) through the Global Challenges Research Fund (GCRF) – a key component in delivering the UK AID strategy that puts UK-led research at the heart of efforts to tackle the United Nations Sustainable Development Goals.
